Quote of the Day

Only in human-life the Jiva can throw off the veil of Maya-delusion and realise its True-self. It can lose its seemingly separate identity and become completely submerged with the Creator. To have human-life is the highest fortune of the Jiva because it is the human-life alone in which self-realisation, i.e., God-Realisation is possible.

Entertainment

Kareena Kapoor is Mrs Singh at last!

"Mr Mehta & Mrs Singh is the love story of two people who aren't married to each other," says music composer-turned director Vishal Bharadwaj about his new and by far most ambitious film.

Efforts on to set up health science varsity in Orissa

Bhubaneswar: The Orissa government has decided in principle to set up a health science university in the state.

A report to this effect was submitted by the cabinet sub-committee on health science to the health and family welfare minister Bijayashree Routray here on Friday.

As per the decision, the state government has decided to bring all medical colleges including the three premiere medical colleges and hospital at Cuttack, Berhampur and Burla, dental colleges, homeopathic colleges, ayurvedic colleges and nursing colleges, under one university.

Keeping this in view, the state government had formed a six-member committee on May 20 this year.

The committee, led by Dr Suresh Mohapatra, had other members including Prof Bhagabati Charan Das, Dr Prasant Kumar Senapati, Prof Siddharth Das, Prof J K Ray and Dr B K Ray.

The committee, as per the instructions of the government, has submitted its report to the government by giving recommendation in favour of the university.

While maintaining that the quality of medical education as well as health services would substantially improve with the setting up of the new university, the report has recommended introduction of MSc, anatomy, physics and micro-biology courses in all medical colleges as well as diploma course in the health administration.

According to the health minister, a decision to this effect would be taken up soon.
